# Housing Sales and Market Trends Dashboard

This dashboard provides key insights into the housing market from May 2014 to May 2015. It highlights sales distribution, price trends, and property characteristics. The geographic map shows home sales density, while the daily price trend tracks fluctuations. Histograms display the distribution of house prices, bedrooms, and bathrooms. A heatmap analyzes the impact of property conditions and views on pricing. This tool aids in understanding market trends

# VISUALISING HOUSE MARKET TRENDS REPORT (USING TABLEAU)

## Executive Summary

This project focuses on analyzing and visualizing housing market trends using Tableau. By leveraging publicly available housing data, we aim to uncover patterns in pricing, demand, and regional differences to aid decision-making for stakeholders such as buyers, sellers, and real estate investors.

## Objectives

- Understand historical housing price trends.
- Identify high-demand regions or cities.
- Analyze average prices based on property types.
- Determine seasonal or economic influences on housing prices.

## Dataset Description

- Source: [e.g., Kaggle / Zillow / Local real estate dataset]
- Size: ~20,000 records
- Columns Include:
  - Date
  - City/Region
  - Median Price
  - No. of Sales
  - Property Type (e.g., Apartment, House, Condo)
  - Size (sq. ft.)
  - Bedrooms/Bathrooms

## Data Preprocessing

- Removed duplicates and null entries
- Converted date columns into proper datetime formats
- Normalized region names for consistency
- Created calculated fields (e.g., Price per Sq. Ft.)

## Tableau Visualizations

### 1. Trend Line: Median Housing Prices Over Time

- Line chart showing year-over-year changes
- Filterable by Region and Property Type

### 2. Map: Price Distribution by Region

- Choropleth map showing average housing prices
- Hover tooltips with median price, volume of sales

### 3. Bar Chart: Average Price by Property Type

- Comparison across apartments, houses, and condos
- Region as filter option

### 4. Heatmap: Monthly Sales Trends

- Helps identify seasonal peaks in property sales

### 5. Box Plot: Price Distribution

- Visualizing price ranges and outliers by city

## Calculated Fields in Tableau

- Price per Sq. Ft. = Price / Area
- Year = YEAR(Date)

- Month = MONTH(Date)
- Custom region grouping

## Dashboard Design

- Clean and interactive layout with filters for:
- Time Range
- Region
- Property Type
- Used actions like filter highlighting and drill-downs
- User-friendly titles and tooltips

## Storyboard

1. Introduction to Housing Market Trends
2. Key Visualizations (linked from Dashboard)
3. Summary of Findings
4. Recommendations

## Insights & Recommendations

- Certain cities show steady price increases -> investment opportunities
- Apartments are generally more stable in pricing than houses
- Seasonal peaks observed in spring and summer
- Recommendation to monitor macroeconomic factors influencing demand

## Files Submitted

- Dataset (.csv)
- Tableau Workbook (.twbx)
- Dashboard Screenshot (.png)

- Story Screenshot (.png)
- Final Report (.pdf / .docx)
- Public Tableau Link
- (Optional) Video Demonstration
